-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 10-23 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 60127286. No distinction is seen between the soil additives and method for their production disclosed by JP 60127286, and that recited in claims 1 and 6-23. JP 60127286 discloses a fertilizer composition comprising dolomite, limestone and andesite. (See the English Abstract.)

Claims 1 -23 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over. No distinction is seen between the soil additives and method for their production disclosed by AU 683611, and that recited in applicants' claims. AU 683611 discloses a fertilizer composition comprising dolomite, limestone and basalt. (See claim 3.)

Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1 and 10, it is indefinite as to whether at least three of the recited components are required, or whether the recited group is open

Art Unit: 1793

to other members to the exclusion of three or more of the recited members. In claim 11, it is indefinite as to whether the final blend is required to have sources of any or all of limestone, basalt, dolomite and claystone. Also in claim 11, it is indefinite as to what steps would be involved in determining the "applicability" of bulk rocks to be used as the various rock sources. That is, it is not clear as to what the criteria would be in determining whether or not a bulk rock would be "applicable" to being used as a "source rock". It is also indefinite as to what size range would be embraced by "predetermined size". In claim 17, "at least one drying steps" is ungrammatical and therefor indefinite.
